## Editorial

The first six months of 2020 have been dominated by the global COVID-19 pandemic. It has been one of the few things which have affected the whole world in the past seventy five years.

It has sadly caused the death of Professor Dr Herbert (Bert) Manners, a friend of St Clements University and United Kingdom pioneer in non-traditional education, by getting people's skills and knowledge recognised via their participation in Professional Qualification Organisations.

The past three months has been difficult for all parts of St Clements due to lockdowns.

It stopped our proposed Silver Jubilee Leadership Summit, which was planned to be held in Lausanne on the 16<sup>th</sup> and 17<sup>th</sup> of March.

In the late 1990's St Clements University developed a partnership with Paul and Paula Kamara to develop a University in Sierra Leone. Initially the Sierra Leone partnership was with Kissy Computer Institute and this school evolved into IAMTECH Institute. St Clements University spent several years trying to get a license in Sierra Leone. It became corporately registered there, but there were no regulations for licensing Private Universities. When St Clements University ceased operations in Sierra Leone IAMTECH obtained permission to teach degrees issued by Njala University. St Clements University continued trying to obtain a Private University license. On the 6<sup>th</sup> of May 2020, the Tertiary Education Commission provisionally accredited the University of Management and Technology to start on the 1<sup>st</sup> of June, 2020 for the following 3 years. St Clements University congratulates Professor Dr Paul and Dr Paula Kamara for, after 20 years of hard work on setting up a University in Sierra Leone, finally succeeding.

In late February St Clements decided to restructure its banking services. The lockdown affecting the banks has interrupted this process and has left us without banking services for over two months. People can do written tasks from temporary home offices, but not more complicated ones where committee decisions are needed.

## **Apology: Re Anchor March 2020 Publication – Article 'Highlights of St Clements University History – Part II'**

For the record we wish to inform you that we have unfortunately used the wrong name in the abovementioned article. The then 2<sup>nd</sup> Deputy Prime Minister of Cambodia (**H.E. Dr Gen. Nhek Bun Chhay**) is the correct name not (H.E. Dr Noun Samphea) as published. The editor wishes to apologise for this incorrect information. H.E. Dr Gen. Nhek Bun Chhay is the Deputy Chancellor of St Clements University.

## Academic Councillor Ties the Knot

St Clements Education Group would like to congratulate Dr Roderick O. Ford on his recent marriage to Helen Johnston – She has been an ordained Methodist Pastor for 25 years and will be active in the William Wilberforce International Human Rights Law Centre.

**Applications Now Open for 2020 Doctor of Letters Candidates**

## Vale Professor Dr Herbert James Manners

C.Eng., F.I.Mech.E.,  
M.I.C.E., F.I.Prod.E.,  
F.I.M., F.M.S., F.I.Plant.E.,  
F.I.E.E., F.S.O.E., F.I.M.S.,  
F.I.Manf., F.Prof.BTM.,  
F.A.M.S., F.A.E.A.

On Thursday 9th April 2020 Herbert James Manners passed away at the age of 97 in Warwick Hospital, Warwickshire after contracting COVID-19.

Herbert James Manners was born in Bristol on 10th January 1923. He was troubled by illness during his childhood, which affected his schooling and resulted in him leaving school at the age of 11½. He helped out at a garage of a friend of his father's. At 15 years of age, Herbert began work on a capstan lathe at Douglas Motorcycle Company in Bristol and progressed to become a setter operator. He became involved in the production of components for the war and later became a production foreman.

At the age of 17, Herbert decided that he needed to revisit education to try to get some qualifications, so began to study at night-school. During the war, he was compelled to work for five years mining in a Yorkshire coal pit as a result of being called up under the Bevan scheme (having no choice to join the armed forces), married a Yorkshire girl, Mary Deakin, and continued his studies at Whitwood Mining & Technical College, gaining the Ordinary National Certificate (ONC) in Mechanical Engineering.

After working in the drawing office of a firm in Leeds for a while, he later returned to Bristol to take up the position of draughtsman in the town of Yate in the jig and tool drawing office. Herbert continued with his studies on day release and part-time evening university attendance to achieve the Higher National Certificate (HNC) in Production Engineering and the HNC in Mechanical Engineering. He gained entry into the Institution of Production Engineers and the Institution of Mechanical Engineers and later became a Chartered Engineer in both.

Herbert advanced in his career and became Assistant Chief Draughtsman in the Drawing Office on chemical plant design in Yate, then in

later years, became a consultant at Norris Industrial Consultants in Bristol, from which position he took examinations and became a Chartered Civil Engineer.

Further progression brought him to Kenilworth, Warwickshire, to work as Production Manager of M H Hurst (Engineering) Ltd in 1961, and he was later promoted to Works Director, a position he held for 21 years. From becoming a Chartered Production Engineer, a Chartered Mechanical Engineer and a Chartered Civil Engineer, he was able to apply his K.S.E. (Knowledge, Skill and Experience) to start his own Management Training Company, Industrial Management Services (IMS) Ltd and from this foundation, from 1971, he developed five professional bodies over several years: The Institute of Management Specialists (1971), The Institute of Manufacturing (1978), Professional Business & Technical Management (1983), The Academy of Multi-Skills (1995) and The Academy of Executives & Administrators (2002), which he operated as Founder and President for nearly 40 years until he retired in March 2010.

Herbert was granted the title of Professor (1999) for the work that he did in industry, education and technology. He was also granted the status of Doctor (2004) for work done in Mechanical Engineering as a Director in industry, training and education.

In his later years, he attended Bible study classes and produced 48 booklets, entitled The Christian Continuous Development Series (CCDS), based on the studies shared at these meetings to help strengthen God's kingdom and the teaching of God's word. His great wish was that he would carry on with this work right up to the time of his passing, which he did.

Herbert was preceded in death by his first wife, Mary, who passed away on 9th June 2001. At the age of 84 he married Jean Pettet on 25th October 2007 and retired from business life at the age of 87. He suffered a stroke when he was nearly 89 from which he fully recovered. Christine, his beloved daughter, passed away on 15th March 2017 with cancer at the age of 62 and then his wife Jean died on 1st June 2017 at the age of 89.

Herbert is survived by his only grandchild, Stephanie, with whom he was due to live in Oxford to enjoy the rest of his retirement. He will be sorely missed by all who knew him.

# ST CLEMENTS UNIVERSITY E-ACADEMIC ADVISORY COUNCIL MEETING

This body had previously last met in 2010 in Lausanne, Switzerland. The previous eight years it had met in London. For the past ten years it has been in hibernation with members regularly keeping in contact but not formally meeting together. With many international organisations turning to E-meetings to enable their discussions to take place, during this time of COVID-19, St Clements decided to hold an E-Academic Advisory Council Meeting.

This was held on Friday, 12th of June at 09:30am GMT, the meeting started and went until 10:45am GMT. The following Councillors were present:

- Dr David Le Cornu - Professor Dr Nagar Lai - Mr Rene Le Cornu
- Dr Kyaw Naing - Hla Myat Mon - Dr Andrew Ssemwanga
- Dr Shadrach Iornem - Professor Dr Erdal Firat - Dr Roderick O. Ford
- Professor Dr Tarun Pathak - Dr Jeff Wooller - Professor Dr Bruce Duncan

Apologies were given for H.E. Dr Noun Samphetamine and Professor Dr Herbert Blankson.

Several (Professor Dr Gerrit Horn and Professor Dr Johan Potgieter) tried but had difficulties logging on. The Administration will be working with them to solve this for future meetings. Dr Le Cornu opened the meeting and the Councillors present gave a 1-2 minute description of themselves. Dr Le Cornu then gave a report on the Silver Jubilee Leadership Summit. The proposed date of the 1<sup>st</sup> of October has been abandoned. A new date will be set in 2021 for the event. Dr Kyaw Naing gave a report on the St Clements University/IQY Technical College Engineering program.

Dr Le Cornu then briefed delegates on the Turks and Caicos Islands Ministry of Education application. Dr Roderick O. Ford then introduced delegates to the William Wilberforce International Human Rights Law Centre and its aims. Dr Le Cornu then explained the process to notarise and apostille our degrees in the US and how to obtain credential evaluation approval for our degrees.

## Professor Dr Herbert Manners’ Established Professional Bodies

### Institute of Management Specialists

This professional body has restructured the format of its twice yearly Journal. It has developed more exposure on professional education offering members a way to upgrade their existing management qualifications via standardising a range of Diploma programs it offers. This year the Institute is 49 years old. It was first established by Professor Dr Herbert Manners.

### The Academy of Executives and Administrators

This is the professional body for general executives and administrators offering a range of membership grades (Associate, Full, Fellow and Companion) and the awards of ‘Certified Executive Practitioner’ and ‘Certified Administration Practitioner’. It has recently established two new grades, Senior Fellow and Doctorial Fellow. These two new awards will only be issued as Life awards to very Senior Executives and Administrators who attend and participate in two or more day conferences or seminars approved by the Academy. This was the last professional body established by Professor Dr Herbert Manners. It was started in 2002.

### Academy of Multi-Skills

This is a leading UK professional body with over 15,000 members. It is a registered UK learning provider (UKPRN: 10036144). The programs it offers are endorsed by TQUK an Ofqual listed course provider of programs from level 3 to 8. It offers over 70 different professional designations. It publishes a Journal ‘Academy of Multi-Skills United Kingdom’ for their members. It holds conferences throughout the World for members to network through. The last one was on Saturday the 8<sup>th</sup> of June 2019. The COVID-19 crisis has delayed the 2020 conference. This was one of the professional bodies established by Professor Dr Herbert Manners.

## Faculty of Professional Business and Technical Management

This body was formed to recognise the management skills of those people working in technical occupations that have evolved into a management position. As well as recognising the management skills they acquire while working it also established routes to encourage them to study programs to develop their knowledge by evaluation their skills and formal education and award them various membership grades (Technician, Associate, Full, Fellow and Companion) based on evaluating these two factors. The Faculty has recognised that the challenge of the 2020’s is to also recognise the skills managers need to understand the technologies that are needed to run management systems if they are to manage in the 2020’s. This was another body established by Professor Dr Herbert Manners.

### Institute of Manufacturing

There are three Institutes that are related to manufacturing in the United Kingdom. There is the **Institute for Manufacturing**. This body was established in 1998 and is part of the Department of Engineering of the University of Cambridge. It is a research body not a professional qualification awarding body. The **Manufacturing Institute** was founded by manufacturers for manufacturers. It is not a professional qualification awarding institute. It was formed in the late 1990’s. The **Institute of Manufacturing** is the oldest and was formed in 1978 (42 years ago) and recognises members professional qualifications by awarding them Associate, Full Member, Fellow and Companion grade membership. Also it offers ‘Certified Manufacturing Practitioner’ status to members who complete an assessment project relating to their work experience and education qualifications together. It was founded by Professor Dr Herbert Manners.

## **COVID-19 Report**

The following are comments from some of our International Academic Councillors regarding how they are handling living with COVID-19.

### **Professor Dr Erdal Firat**

*“During the pandemic of COVID-19, my work hasn't stopped, nor the work in my country, Turkey. I operate in manufacturing business; I am the distributor for the CAD/CAM software Surfcam. We give our services through the remote control applications. Our services haven't been interrupted because of the pandemic. Since, we now are about to open a branch of SCPU in Turkey, I am trying to promote and take registrations to the college. And it is going pretty well. We already have some students waiting for the official opening of the college to register themselves. I am more worried about the post pandemic world than I am about the pandemic situation of now. I think the importance of online education will be increased in this post pandemic world that is about to come. The world will go into an economic crisis, maybe an economic cold war. Because there are voices raised in the Western world, accusing China of this situation and call for economic embargo for China. It seems like production means will be transferred to other countries than China and this might create more opportunities than crisis. The world will probably go into a course of change after the pandemic is taken under control. We will see big changes.”*

### **Professor Dr Johan Potgieter**

The latest threats and health situation around the world caused by COVID-19 also caused much social and economic change in the South African context. Since working from this country in these times are no different from Europe, Australia and many other countries round the globe. They also have lockdown for almost a month with limitations to business operations, movement and social distancing. Office operations are limited but some academic, administrative functions are limited to email, Internet and the usual telephonic communication methods. Academic instruction, coursework, examinations are still ongoing as usual. It also seems that many students have more time to devote to their learning and making steady progress with their coursework. Due to limited staff and important services they are bound to work at a slow pace under these circumstances. They trust that unless the lockdown is extended, things will eventually normalize.

### **Professor Dr Bruce Duncan**

*“Due to my age and underlying health conditions, I am confined to “house arrest” for up to 90 days until the Coronavirus pandemic subsides. I teach at a college preparing international students for university and post-graduate studies. All teaching establishments have closed for face-to-face teaching. The college has now developed its online training platform for use when the new term begins in April. My online students and I meet on SKYPE. I send lessons to them on SKYPE, and we then work in tandem. If they have lessons from school to learn, then they will copy to me, or SCREEN SHARE, and we will work together. Tuition is recorded and available for feedback and accountability. I also use ZOOM or SKYPE for tutoring IELTS and BUSINESS students in China. In tutoring IELTS and GENERAL ENGLISH to students in the UK, Iran and China, I use ZOOM and/or SKYPE. I find working from home more relaxing and, of course, more convenient. Set tuition times allow me to plan my day around work. Hopefully, education will now wake up to the reality of the advantages of working from home. Massive buildings serve a purpose, but with the increasing pressure of maintenance costs (impacting on student fees!), I hope that the cash strapped education ecosystem will not only smell the coffee but drink it.”*

### **Dr David Le Cornu**

He is currently working in the D and B Management office. At this stage the office is still open, but plans have been made for key staff to work from home if the Australian government forces all offices to close. Currently all entertainment venues (restaurants, hotels, places of worship) or any other places people gather in numbers are closed. Australians are barred from international travel and a majority of the states require people from other states to self isolate for 14 days if entering them.

### **Professor Dr Nagar Lai**

*“We are like a prisoner in Hong Kong, we cannot leave Hong Kong or if we choose to do so, upon our return, we need to be isolated for 14 days. No gatherings of more than 4 persons are allowed, and services that may lead to gathering are all closed (cinemas, clubs, bars, etc). Teaching is now online, and people tend to be very cautious on hygiene. Other than that, life is normal. Office work is as usual, and playing table tennis after work is maintained. Now there are less volunteer services except distributing masks (230000) masks sent to the needed ones through my belonged Lions clubs and other non-profit organizations.”*

## Other Universities News

### European University of Saint Petersburg

The European University of Saint Petersburg is a leading non-state Russian University. It is an English Language School which concentrates on offering Graduate programs only. It primarily teaches Ph.D. and MA degrees concentrating on Economic, Ethnology, History, Arts, Political Science and Sociology. It occupies an 18<sup>th</sup> century building similar to the Marble Palace. It is sponsored by a number of European organisations and donations to it are given tax exemption status in 14 European countries.

### Newport International University

It was founded in 1976 at Newport Beach in California. In 2002 it relocated to Wyoming and in 2009 it moved back to California. In 2011 applied for approval to operate under the Bureau for Private Post Secondary Education, the Californian body which approved private universities registered in California. In 2009 a corporate branch was established in Latvia and in 2011 became a separate institution to Newport International University. It started in 1976 in California and in 2014 returned as a Bureau for Private Post Secondary Education licensed institution. See Academic Council News Report No. 35 (2019) for information on Newport University CED.

### POMA International Business University

This school is based in Ifangni Igola - Benin Republic. It has affiliation with Colleges in Germany, Switzerland, Hong Kong, Dubai, Poland and Dublin. It offers schools all around the world to affiliate with it. The website – [www.pomauniversity.ng](http://www.pomauniversity.ng) – is a Nigerian site. The information on how to get there is based on Nigerian students going there. It offers a range of over 20 Bachelor degree programs.

### University of Al Qarawiyyin

The University of Al Qarawiyyin located in Fez, Morocco is the oldest existing continually operating higher education institution in the world, according to UNESCO. It was established as a Madrassa in 859 and in 1963 became a state university. Al Qarawiyyin was founded by Fatima Al Fihre, the daughter of a wealthy merchant name Mohammed Al Fihri, in the 9<sup>th</sup> century.

### Cranfield University

It started in 1946 as the College of Aeronautics to become in 1969, Cranfield Institute of Technology and in 1993, Cranfield University. After 2003 it became an exclusively Post Graduate institution. It runs a *Technology Park* which incorporates the *Nissan Technical Centre*, which designs and develops cars for the European market, *Innovation Centre*, The European headquarters for *Telemaster* which develops advanced technology enabling cards to use roads more efficiently.

### Venice International University

Venice International University was founded in 1995 (same year as St Clements University) was established by a consortium of five universities and two other Italian institutions. Since then the consortium has grown to 18 members. The consortium includes Boston College (USA), Duke University (USA), Ludwig Maximilian University of Munich (Germany), Tel Aviv University (Israel) Korean University (Korea), Tsinghua University (China), European University at Saint Petersburg (Russia) University of Switzerland (Lausanne). It is situated on the island of San Servolo, a few minutes from St Marks by water bus – it has an alumnus of over 16,000.

### Marmara University and Merit University

*Marmara University*: is one of the oldest education institutions in Turkey – established in 1883. It became known as Marmara University in 1983. It has nearly 3000 Academic staff and 70,000 students. It is a public university in the Fatih District of Istanbul.

*Merit University*: is a new private university being developed in the city of New Sohag in Upper Egypt. It will be specialising in teaching Medical programs and attracting students from throughout the world to attend it. It would appear to be largely financed by UAE Investors. New Sohag is a new city developed to take the growing population of 5 “old” Sohag cities and Merit University will be the leading university in this new city.

### University of Bologna

The University of Bologna in Western Europe was founded in 1088 by students and for students. It initially limited its teaching to the Province of Bologna and in 1989 initiated a program of decentralisation established campus in Romagna, Forli Cesena, Ravenna and Rimini. In 1998 it established a Campus in Buenos Aires.

## Getting Your St Clements University Degree Notarised and Apostilled

One of the problems St Clements University graduates have is having their degree notarised and apostilled. We have been able to organise for you have your degree transcript notarized and apostilled in the US State of Ohio. The cost for this service will be US\$190.

There are only three consulate offices in the Turks and Caicos Islands (Haiti, USA and Jamaica). The nearest location for the consulates and embassies of most countries is Washington.

It is then possible to have your notarised and apostilled degree endorsed by the US Secretary of State and that endorses degrees presented to the embassy of the country you live in validate the endorsement.

As a general rule countries which do not have consulates or embassies in their country allows documents from that country to be endorsed by their embassy in a neighbouring country. The cost of this service is US\$600 plus the particular embassy processing fee which ranges from US\$100 - \$300.

For further information please email Mrs Judith Garforth - St Clements University Student Registrar at [admin@stclements.edu](mailto:admin@stclements.edu).

## St Clements Engineering Programs

St Clements University Myanmar College has worked with IQY Technical College to offer a range of Engineering Programs. The qualifications for these awards will be issued by Ecole de Ingenieurs SCPU and IQY Technical College.

### • **Diploma of Engineering (IQY Diploma)**

This is a one year generic engineering program designed to give students the foundations to study most engineering disciplines.

### • **Associate of Engineering (IQY Advanced Diploma)**

This program is designed to develop students' ability to work as a Technician. IQY Technical College is an accredited Singapore Institute of Engineering Technologists (SIET) training centre.

### • **Bachelor of Technology in Engineering**

This is a 3 year degree and is designed to fulfill the SIET Fellow grade education requirements (to obtain SIET Fellow status there is also a work experience requirement).

### • **Bachelor of Engineering**

This is a four year program. Candidates are required to have a Bachelor of Technology or equivalent and complete an extra 30 credit hours to obtain professional membership status with the IFEES-USA. These programs are available in a number of Engineering disciplines (Civil, Mechanical, Electrical, Marine and Petroleum).

All of these degrees are taught in co-operation with the Institute of Professional Engineers Myanmar. The IPEM is a member of the International Federation of Engineering Education Societies (IFEES-USA) the international body representing engineering education bodies.

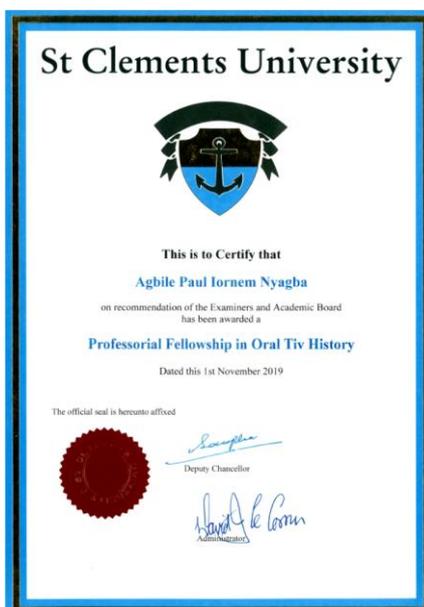

These programs are also endorsed by the Institute of Manufacturing (UK), Faculty of Professional Business and Technical management (UK) and Society of Professional Engineers (International).

They are taught in Myanmar in a hybrid e-tutoring part-time classroom model. They can be structured to be taught wholly on-line. They are taught in English with supplementary tutoring in both Burmese or Turkish.

The course director of the program is Professor Dr Kyaw Naing. For enrollment details email Dr David Le Cornu at [admin@stclements.edu](mailto:admin@stclements.edu) or Professor Dr Kyaw Naing at [kyawnaing2524@gmail.com](mailto:kyawnaing2524@gmail.com).

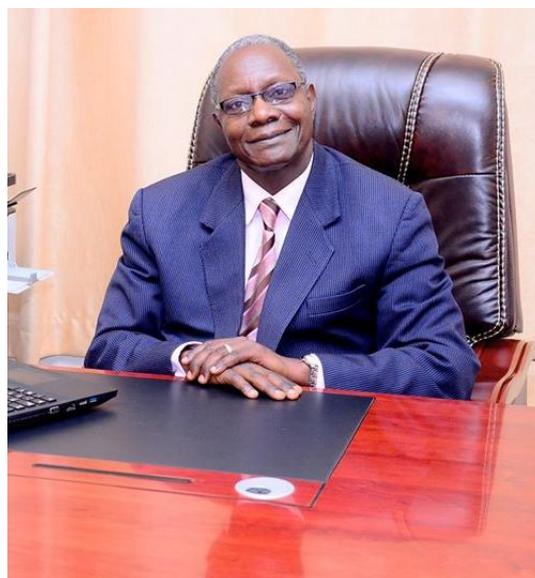

## St Clements University's First Professorial Fellow Dr Agbile Paul Iornem Nyagba

**Professor Dr Agbile Paul Iornem Nyagba** was made St Clements University's first Professorial Fellow for his oral recordings of Tiv Social Culture for when it first came in regular contact with British Colonial authorities until the 21<sup>st</sup> Century. He lived through this history from a village leaders' perspective. He wrote an Autobiography about his life and the various attitudes he had during the time Tiv culture evolved due to these outside influences. A number of people associated with St Clements University in Nigeria are ethnically Tiv. He is the expert in Tiv Village history from this period of time.

## St Clements Alumni becomes Vice Chancellor of St Lawrence University Uganda

**Dr Andrew Ssemwanga**, an early Doctor of Management graduate of St Clements University, is the Vice Chancellor of St Lawrence University – Uganda. This school is a major Ugandan University specialising in integrating Business Incubating Centres within its Campus Complex. He was appointed to this role in 2018. He worked closely with Dr David Le Cornu and Professor Dr Johan Potgieter when St Clements was trying to establish St Clements Open University in Uganda in 2005 and 2006. It is always very satisfying to see our St Clements Alumni become Education leaders.

## Transnational Education

This is the term used to describe when students study at a school whose home is not where the student is domiciled. It covers students who travel outside their country to study and those who study online with an education institution outside the country they reside in. All of St Clements University students are Transnational Education students.

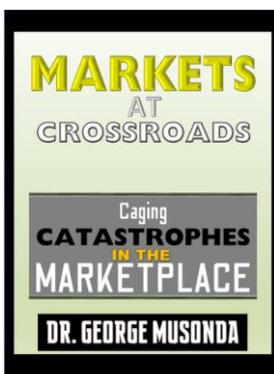

The students studying a St Clements Institute and St Clements University College are at this stage and some of the students studying with École Supérieure Universitaire St Clements and Commonwealth are not. Thus if you have studied with St Clements University or SCPU (St Clements Private University) you were a Transnational Student.

## St Clements Alumni Dr George Musonda's New Publications

**Markets at Crossroads** is an insightful exposition of global marketplace happenings following years of Dr George Musonda's engagement in organizational capacity building, supporting more than 17 countries in Africa and beyond. Following his

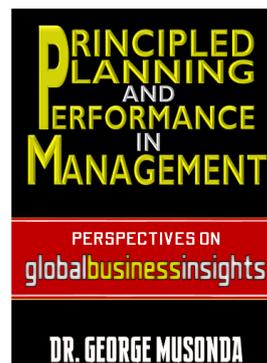

Marketing coursework under St Clements University, he continued to observe unique market trends in various social settings around the world. His final moments during documentation of the book was when we witnessed the invasion of the global marketplace by one of the deadliest global pandemics in the history of human existence – the CORONAVIRUS DISEASE (COVID-19) outbreak.

The 305 paged book therefore encapsulates real life principles that engender the practice of attested marketing approaches that, one would be right to submit, have been observed to inspire markets' resuscitation over the years. It is not only an important

toolkit for inspiring emerging entrepreneurs to reach out for stars in their enterprise endeavors; it will be seen to be an important instructions manual for universities and colleges.

Governments and other institutional leaders will also find it treasurable. Principles herein will inspire decision makers to self-introspect, thereby enabling them to redefine the essence of disaster preparedness and mitigation in the face of marketplace maiming socioeconomic doldrums.

This book provides unequalled guidance on corporate enterprise protocols that are vital in restoring markets seen to be traversing economic crisis crossing points.

The MANAGEMENT book also available is the sequel to MARKETS AT CROSSROADS.

The books are available for purchase on Amazon in various nations including Canada, UK, France, at \$30 each. It is trending as an eBook version.
